ZEP HIGH PERFORMANCE ZINC ENHANCED ENGINE PROTECTOR

>>Description

ZEP contains Torco MPZ®, a perfect balance of zinc, phosphorus and moly. The friction fighting chemistry of MPZ® adds wear protection by into motor oils that have “zinc”, the anti-wear chemical, purposely removed. ZEP won't rub off, wear off, scrap off or scuff off. For this reason, it is excellent for high-performance engines, especially those with flat tappet cams. ZEP coats all engine parts and protects them from “dry starts,” a leading cause of engine damage in vehicles kept in storage and drive infrequently.

>>Typical Applications

Treats 6 quarts or 6 liters of oil. Mixes will all synthetic- and petroleum-based oils. Recommended for Hot Rods, Muscle Cars, Sports Cars, Exotics, Classics, Collector Cars, Low-Mileage and all Stored Vehicles.

>>Chemical Targets

Zinc, wt%	1.95
Phosphorous, wt%	1.68
Sulfur, wt%	6.80
Calcium, wt%	3.70
Nitrogen, wt%	0.45

>>Physical Properties

Specific Gravity @ 60°F	1.0112
Viscosity, cSt @ 100°C	37.9
Sediment, vol%	<0.01
Color, D-1500	<7.5
TBN	110
